

AVIATION CAREER EXPERIENCE DAY

Sydney Flight Training, a CASA Part 141 accredited flying school at Bankstown Airport, offers an aviation experience designed specifically for high school students exploring careers in aviation or studying engineering.

This immersive programme provides practical insights whilst offering students the opportunity to commence their aviation journey through our Recreational Pilot Licence (RPL) training.

Overview

Our experience day comprises a structured visit to our training facility, incorporating hands-on activities.

Students receive personalised instruction from our experienced flight instructors, gaining valuable insights into the aviation sector.

"The students LOVED the experience and we definitely achieved my objective for the excursion. They all commented that everything they have been learning about flight forces became so much clearer!"

Silvia Baylie, Engineering and Science Educator, Waverley College

What's Included?

- A professional **pre-flight briefing** covering fundamental aviation concepts.
- A **Trial Introductory Flight (TIF)** with a qualified instructor, where they'll have hands-on control of the aircraft.
- The session includes practical engineering exposure, allowing students to explore **aircraft systems** and **engine operations**.
- For an alternative experience we can replace the flight with time in our **Flight Simulator**, while maintaining the same ground instruction.

What do the students say about their day?

"I understand the forces of flight so much better now!"

"It was so much fun and I never thought Sydney was so big!"

"Oh I don't want to feel those G-forces again!"

Experience Day Information

- Group size: Optimally 4-6 students (larger groups can be accommodated)
- Duration: Half-day programme
- Cost:
 - \$500 per student, inclusive of Trial Introductory Flight or
 - \$100 per student for the Flight Simulator experience
- Suitable for Years 10-12
- Particular relevance to Aviation Studies and Engineering students
- All equipment and materials provided

Next Steps

To arrange a visit or discuss specific requirements, please contact our Operations team. We can tailor the experience to align with your school's curriculum focus and student interests.
